

CYCHECK

DATA SHEET

What is **CYCHECK**?

CYCHECK is a bespoke Cyber Security Assessment Service.

A cyber security risk assessment is an essential part of any organisation's strategic risk management and mitigation strategy.

We can check and measure your current Cyber Security protections and compare it to established security benchmarks applicable to your business sector.

Our CyCheck Cyber Tools will allow you to build a budgeted plan and roadmap with timescales to put in place cost effective cyber defences that give peace of mind to the business stakeholders, clients and industry partners.

Allow your organisation to reach its full potential, let your team and customers work with you with confidence based on recognised cyber standards.

- Human-led Cyber Health Check.
- Identify, Manage and Mitigate your security risks.
- Provide Customer & Supplier Confidence.
- Meet Information Security contractual obligations.
- Meet compliance, governance, and data protection requirements.

Whether your organisation is looking to augment its security testing program or is just getting started, the CIS Cyber Division has a comprehensive range of services to help develop your Cyber Security setup to give peace of mind.

YOUR TRUSTED CONSULTANT

Combining the knowledge, skills, logic, and tool sets of our qualified Cyber Security Consultants into one, **CYCHECK** is the perfect service to give you that peace of mind.

MEASURABLE COMPLIANCE

Our CyCheck Dashboard gives an instant view of your security status, and helps identify where compliance has been made or requires improvement, thus giving a clear picture as to your compliance with known standards.

MEET COMPLIANCE, MEET BEST PRACTICES

By identifying, managing and further mitigating your security risks you want, your organisation can be assured that it will continuously meet security best practices and compliance regulations.

CYCHECK

Assess, Plan, & Implement.

CYCHECK tools and consultancy help establish where your business cyber risks are, what the impact and cost might be. With the help of our expert qualified consultants we are able to help plan, budget and assist implement appropriate cyber security systems to meet industry recognised benchmarks.

BENCHMARKING

CYCHECK can be used to benchmark your business against popular and recognised standards including Cyber Essentials, Cyber Essentials Plus, ISO27001, NIST and other specific frameworks. Any gaps or improvements can be planned, implemented and maintained.

DETAILED ROADMAP

CyCheck gives detailed breakdowns of Cyber Risk compliance and areas that are both underperforming or meeting standards, and therefore generating a detailed roadmap of progressing your Cyber Strategy.

RISK AND IMPACT ASSESSMENT

Our qualified consultants will help you understand the risks and impacts of cyber attacks on your business and thus help demonstrate the financial return on any cyber investment or plan.

RISK DASHBOARD

The CyCheck modelling tool has a Strategic Dashboard that graphically demonstrates areas of risk and benchmark compliance in a clear and simple way.

DEMONSTRATE CYBER COMPLIANCE

Demonstrate cyber compliance with the help of CyCheck to your Board, Stakeholders, Customers, Suppliers or other industry partners. Annual checks to help maintain ongoing compliance to new or revised standards to make sure you keep your protections up to date and relevant to new risks.

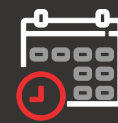

BUDGET PLANNING

CyCheck can help plan appropriate budgets to address risks including priority and best value order to ensure any investment maximises any return.
